EDUCATION & SKILLS

Purdue University Main Campus, West Lafayette, IN
Ph.D. in Computer Science

August 2020 - Present

GPA: 3.96/4.00

Purdue University Main Campus, West Lafayette, IN
Bachelor of Science

August 2016 - May 2020

GPA: 3.90/4.00

Majors: Honors-Mathematics; Honors-Statistics. **Minor:** Computer Science

Study Abroad: Tsinghua University, Spring 2019

Programming Languages (Ordered by proficiency):

Python – (Scipy, Scikit-learn, Numpy, Pandas, Pytorch, Tensorflow), C, Java, R, SAS.

EXPERIENCE

Purdue University, West Lafayette, IN
Graduate Research Assistant

January 2021 – Present

- Created and theoretically validated a new inverse reinforcement learning (IRL) algorithm which provides the first provably correct method for IRL in the continuous setting, with applications to optimal control and automation
- Collaborated with other researchers to develop and test a new linear optimization algorithm which achieves state-of-the-art performance in solving linear programs with low exact rank
- Analyzed the performance of neural network architectures via spectral analysis of neural network weight matrices
- Implemented the above algorithms in Python while optimizing for numerical stability and time/memory efficiency

Sandia National Laboratories, West Lafayette, IN
Graduate Student Mentor

August 2020 – May 2021

- Mentored a team of undergraduate students to develop a prototypical analytic toolkit in Python as part of a pipeline capable of providing stream-lined data analysis of experimental wargame data
- Utilized best practices while developing the analytic toolkit, including using Kanban, Agile/Scrum methodology, and Git
- Developed a novel strategy classification meta-algorithm which had 90% accuracy in synthetic experiments

Purdue University, West Lafayette, IN
Graduate Teaching Assistant – Introduction to Data Science (CS 242)

August 2020 – December 2020

- Taught undergraduate students introductory data science topics such as data visualization, hypothesis testing, dimensionality reduction, data clustering, supervised learning, and data manipulation by using R, Python, SQL, and native Unix commands
- Oversaw a group of undergraduate teaching assistants to carry out course tasks such as creating assignments, grading assignments, and managing course logistics

Regenstrief Institute, Indianapolis, IN
Machine Learning Research Intern

May 2018 – April 2020

- Identified and characterized a current gap in the health informatics literature on usage of machine learning in healthcare
- Presented these findings to over 400 professionals through conferences hosted by the American Medical Informatics Association (AMIA) and International Medical Informatics Association (IMIA)
- Applied natural language processing techniques (NLP) to free-text medical records to create a random forest classifier in Python capable of detecting whether a patient has tested positively for diseases tracked by the Indiana Health Department
- Created a generative adversarial neural network capable of generating statistically indistinguishable synthetic patient data which enables training of downstream models while maintaining patient privacy

AWARDS & ACCOMPLISHMENTS

- Purdue Senior Achievement Award in Mathematics – Honorary scholarship given to select math majors
- Goldwater Nominee – Nominated as one of four students from Purdue University for the national Goldwater scholarship
- Chinese Government Scholarship – Received housing and a stipend from the Chinese government for academic excellence
- Apple/Google Fellowships (Nominated, Ongoing) – One of two students nominated by Purdue University for each fellowship
